

nano-cement for concrete

beautiful | durable | bespoke

"We have tried it and it is very workable, has a good pot life while you're trowelling and doesn't need a primer." – Client Testimonial.

Pinfix nano-cement for concrete fills super-fine pinholes, small air voids, pop-outs, cracks and other gaps in the concrete surface to create a monolithic surface ideal for all polished concrete applications.

pinfix

nano-cement for concrete

Pinfix is available in white and natural grey. All CC colours are available upon request. Ideal for all concrete surfaces including polished concrete floors and benchtops. Designed by CC for a superior finish.

advantages

- Natural Portland cement based, meant to bond with concrete
- Fills the finest of pin holes
- Easy to apply by hand or machine
- Good pot life
- Doesn't need a primer
- Ideal for grouting all polished concrete surfaces
- Excellent for natural crack repair
- Can add Extra Fine Sand for patch repair

application

Always test a small area to confirm suitability, coverage rate and desired results before beginning overall application.

- Thoroughly clean and prepare the substrate
- Mix CC Pinfix (100ml water to 300g Pinfix)
- By hand use grout spreader or, by machine with the grouting plates
- Do manageable sections, say 3-4m at a time
- Let cure for 24 hours (4 hours minimum)
- Remove with 100 resins (rubbing block or machine) wet or dry
- Finish floor to desired sheen, clean up with water
