

eco7 concrete 

Australian sustainable concrete

beautiful | durable | bespoke

"Watching the world embrace the idea of zero-waste is one of the most exciting prospects on earth." - Joost Bakker, zero-waste activist.

Inspired by this vision, we have developed our new Australian *eco7* Concrete range that has a reduced carbon footprint and low environmental impact whilst keeping a timeless and organic aesthetic.

Australian sustainable concrete

Our Australian eco7 Concrete is ideal for indoor and outdoor applications.

Available in all colours, your choice of aggregates (including recycled brick and concrete) and finishes. Safe, reliable alternatives to engineered or plastic stone.

Making waste great again!

why we love it & why you should too

▪ Natural Materials

No polyester resins or plastic & low silica. Only natural responsibly sourced materials.

▪ Durable

Engineered to be high strength & exceptionally durable with an efficient lifecycle.

▪ Recyclable

Recyclable & can be repurposed for post-consumer applications.

▪ Low Energy

Naturally cured at ambient temperatures, ensuring a lower embodied energy.

▪ Passive Energy Efficiency

Combined with smart design, concrete's thermal mass reduces the operational energy needs of large buildings.

Small Carbon Footprint: Go as Green as You Want

Portland cement is replaced with industrial furnace wastes.

Mined sand is replaced with recycled kerbside waste.

Quarried aggregates are replaced with recycled brick or concrete building rubble.
