

real concrete overlay and tile

concrete
collaborative

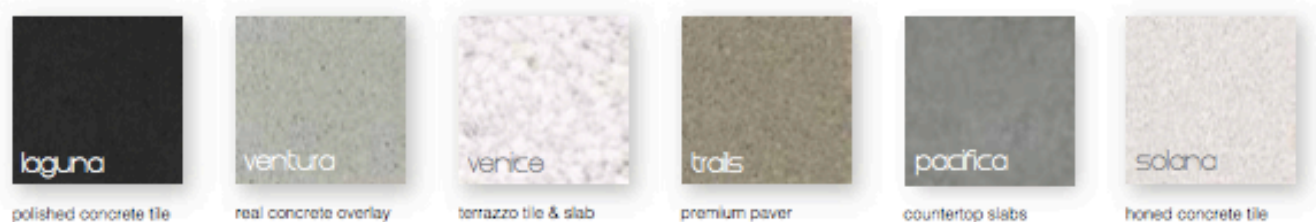

the collaborative

"we craft a range of unique and sustainable concrete products supplied in collaboration with architects, designers and builders to create innovative solutions for interior and exterior environments.

we are committed to the innovation of concrete and provide complete product solutions using specialist knowledge, service, and processes."

the collection

the material

concrete has been used in construction for centuries for its durability and versatile nature. for artisans, it is the material of choice due to its fluidity and beauty. the collaborative has blended art and science to create a suite of truly unique products that embrace both form and function. our concrete mix design uses no resins or additives ensuring all of our products maintain the inherent sustainability of concrete.
